

# SYEDA QURRATH UL AIN

Bengaluru, India • +91 9741940080 • [gurrath2809@gmail.com](mailto:gurrath2809@gmail.com) • [linkedin.com/in/syeda-qurrath282](https://www.linkedin.com/in/syeda-qurrath282) • [github.com/syedaqurrath](https://github.com/syedaqurrath)

Software Engineer with experience building AI-integrated applications, backend systems, REST APIs, authentication workflows, and real-time interactive platforms. Proficient in Python, JavaScript, backend engineering, computer vision, and scalable software development with exposure to software development lifecycle (SDLC), cloud-based systems, and backend application development.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, Java, SQL

**AI & Computer Vision:** OpenCV, MediaPipe, Machine Learning Fundamentals, Data Preprocessing, Data Analysis

**Backend & APIs:** Node.js, Express.js, RESTful API Development, Backend Development, JWT, bcrypt, OAuth 2.0, Passport.js

**Databases & Cloud:** MongoDB, PostgreSQL, MySQL, Supabase, Cloud Services, Scalable Systems

**Web Technologies:** React.js, Vite, Web Speech API, React-Leaflet

**Developer Tools:** Git, GitHub, Postman, VS Code, Netlify

**Core CS:** OOP, DBMS, OS, SDLC, Debugging, Software Engineering, Problem Solving

## EXPERIENCE

### AI & Data Science Intern | [Ozenfx](#)

May 2026

- Executed end-to-end data preprocessing and feature engineering tasks for ML model evaluation workflows.
- Analyzed structured datasets using Python; produced exploratory visualizations to surface patterns and drive model decisions.
- Applied machine learning pipeline concepts to real datasets, bridging theoretical understanding with practical implementation.

### Open Source Contributor | [GirlScript Summer of Code \(GSSoC\)](#)

Oct 2025

- Resolved frontend bugs and improved component-level usability across high-traffic open-source repositories using React.js.
- Collaborated within Agile-style development workflows using Git-based version control practices including branching, rebasing, and pull requests.

## PROJECTS

### Hand Gesture Recognition System — *Python, OpenCV, MediaPipe*

- Built a real-time computer vision system for touchless desktop interaction using OpenCV and MediaPipe.
- Processed live camera streams with low-latency gesture recognition workflows and modular interaction mapping.

### Multi-Factor Authentication System — *Node.js, Express.js, MongoDB, Passport.js, React*

- Engineered a secure authentication system using JWT, bcrypt hashing, OAuth 2.0, and RESTful API workflows.
- Developed authentication, email verification, and session management APIs with a React-based security dashboard.

### PrepAI — AI-Assisted Learning Platform — *React.js, Node.js, Express.js, MongoDB*

- Developed a backend-driven learning platform with modular REST APIs supporting personalized preparation workflows.
- Integrated AI-assisted interaction features with structured frontend and backend state management.

### Tourist Assistance Platform — *React.js, Supabase, React-Leaflet, Web Speech API*

- Built a location-aware SPA with real-time map rendering via React-Leaflet and Supabase-backed authentication and data services.
- Integrated a voice interaction layer using Web Speech API, enabling real-time voice interaction workflows for user assistance.

## EDUCATION

### Presidency University

Dec 2024 – May 2026

Master of Computer Applications (MCA) — Coursework: DBMS, OS, Software Engineering CGPA: **8.6 / 10.0**

### Bapuji Institute of Engineering & Technology

Nov 2021 – Aug 2024

Bachelor of Computer Applications (BCA) — Graduated with Distinction CGPA: **8.9 / 10.0**

## CERTIFICATIONS & RECOGNITION

- Oracle Certified AI Foundations Associate — Cloud Infrastructure & AI/ML Fundamentals
- Postman API Fundamentals Student Expert — Advanced API Testing & Documentation
- GSSoC 2025 Contributor Recognition — Awarded for consistent high-quality open-source contributions
